

SMART
3RD CALL PO PROPOSERS' DAY

LEUVEN (BELGIUM)

3rd October 2019

The background of the image is a collage of industrial machinery, including what appears to be a robotic arm and various metal components, all rendered in a dark green, semi-transparent overlay. The text is centered over this background.

SMART

advanced manufacturing

WHAT IS SMART CLUSTER?

Transnational and **industry-driven R&D&I programme** in the domain of advanced manufacturing technologies.

SMART is a EUREKA Cluster programme, enabling a **global ecosystem** of large industry, SMEs, start-ups, academia and research organisations.

SMART promotes **bottom-up projects**.

MISSION

SMART mission is to boost the **competitiveness, growth and attractiveness of the European discrete manufacturing industries** through the promotion of R&D&I in an **open ecosystem of industrial organisations**: large industries, SMEs, associations; **RTOs and academia.**

VISION

SMART vision is to become the **preferred programme for international close-to-market R&D&I advanced manufacturing projects** in the following sectors:

AERONAUTICS

AUTOMOTIVE

CAPITAL GOODS

RAILWAYS

CONSUMER
DURABLES

OTHERS DISCRETE
MANUFACTURING
SECTORS

SMART will be permanently adapting to **rapidly changing market needs, national priorities and dynamic strategic movements** that European manufacturing companies must address to remain competitive and stay at the cutting edge of technological development.

TECHNICAL DOMAINS

**Advanced
Manufacturing Processes**

**Intelligent and Adaptive
Manufacturing Systems**

**Digital, Virtual and Efficient
Companies**

**Person-Machine
Collaboration**

Sustainable Manufacturing

**Customer-based
Manufacturing**

Technical Domains

Advanced Manufacturing Processes

- **Production processes for new composites**, ceramic and thermoplastic materials.
- Development of low cost **composite materials** and processes for **high volume production**, including out of autoclave.
- **Integration of Manufacturing Processes**: machining, laser, chemical, ultrasonic, additive,...
- **Resource (material and energy) efficient** metal removal processes for advanced metallic alloys.
- Generation of **new part functionalities through surface** manufacturing processes.
- Advanced **additive manufacturing technologies** for optimum light designs and manufacturing aids.
- **Advanced modelling and simulation** tools for manufacturing process design and optimization.
- Advanced **union of hybrid materials**.

Technical Domains

Intelligent and Adaptive Manufacturing Systems

- Advanced **on-line processes monitoring and control** systems.
- Development of **measurement systems, sensors and indicators** algorithms for process diagnosis and optimization.
- Robotic toolbox including **light automation and collaborative robotics**
- **Real-time monitoring and optimization** of machines and equipment.
- **Advanced metrology** and non-contact, vision based parts on-line measurement in manufacturing processes.
- Advanced sensor system, **multi-sensor fusion**.
- Advanced automated **non-destructive inspection operations** (NDT)
- On-line inspection for **zero defects manufacturing**

Technical Domains

Digital, Virtual and Efficient Companies

- **Simulation techniques** in manufacturing and assembly processes to increase ergonomics, first-time -right and production rates.
- Use of **big data and evolutionary algorithms for process diagnosis**, monitoring & control as well as predictive maintenance.
- Complete **traceability of tools, production progress and products** in real time.
- **Cybersecurity** and secured concepts for communications and cloud computing.
- **Virtual reality and augmented reality** simulators for planning and operation of manufacturing systems.
- Comprehensive modelling and simulation tools. **Cost models linked to design**, productivity, end of life and recycling.

Technical Domains

Person-Machine Collaboration

- Smart use of **IoT and virtual or augmented reality**.
- **Improved visualisation** and analysis of complex production flows.
- Advanced **operator information systems**, production and process model based systems to support operator decisions
- **Intuitive programming devices**, aimed at multimodal tasks and based on new dialogues between humans, machines and robots
- Friendly and **inclusive work environments** (noises, emissions, vibrations, loads, repetitive tasks, ergonomics).
- Ergonomic **human-robot collaboration**, for Human performance improvement and error minimisation.
- Concepts for **safe automation of operations and of system integration**
- **Augmented and immersive reality** for fast training, secure and efficient operation

Technical Domains

Sustainable Manufacturing

- **Cleaner processes, with less resource consumption:** materials, energy, lubricants, etc. and reduction of generated waste
- Improving the **cost and weight of parts** using additive manufacturing and other net-shape manufacturing techniques
- **Design aimed at manufacturing, assembly, disassembly, remanufacturing, reuse and recycling.**
- Processes with **zero emissions and waste.** Towards zero defects.
- **Industrial symbiosis:** using, recovering and redirecting resources for reuse.
- **Reduction of the carbon footprint of production processes.**
- **Recyclability** of new materials.

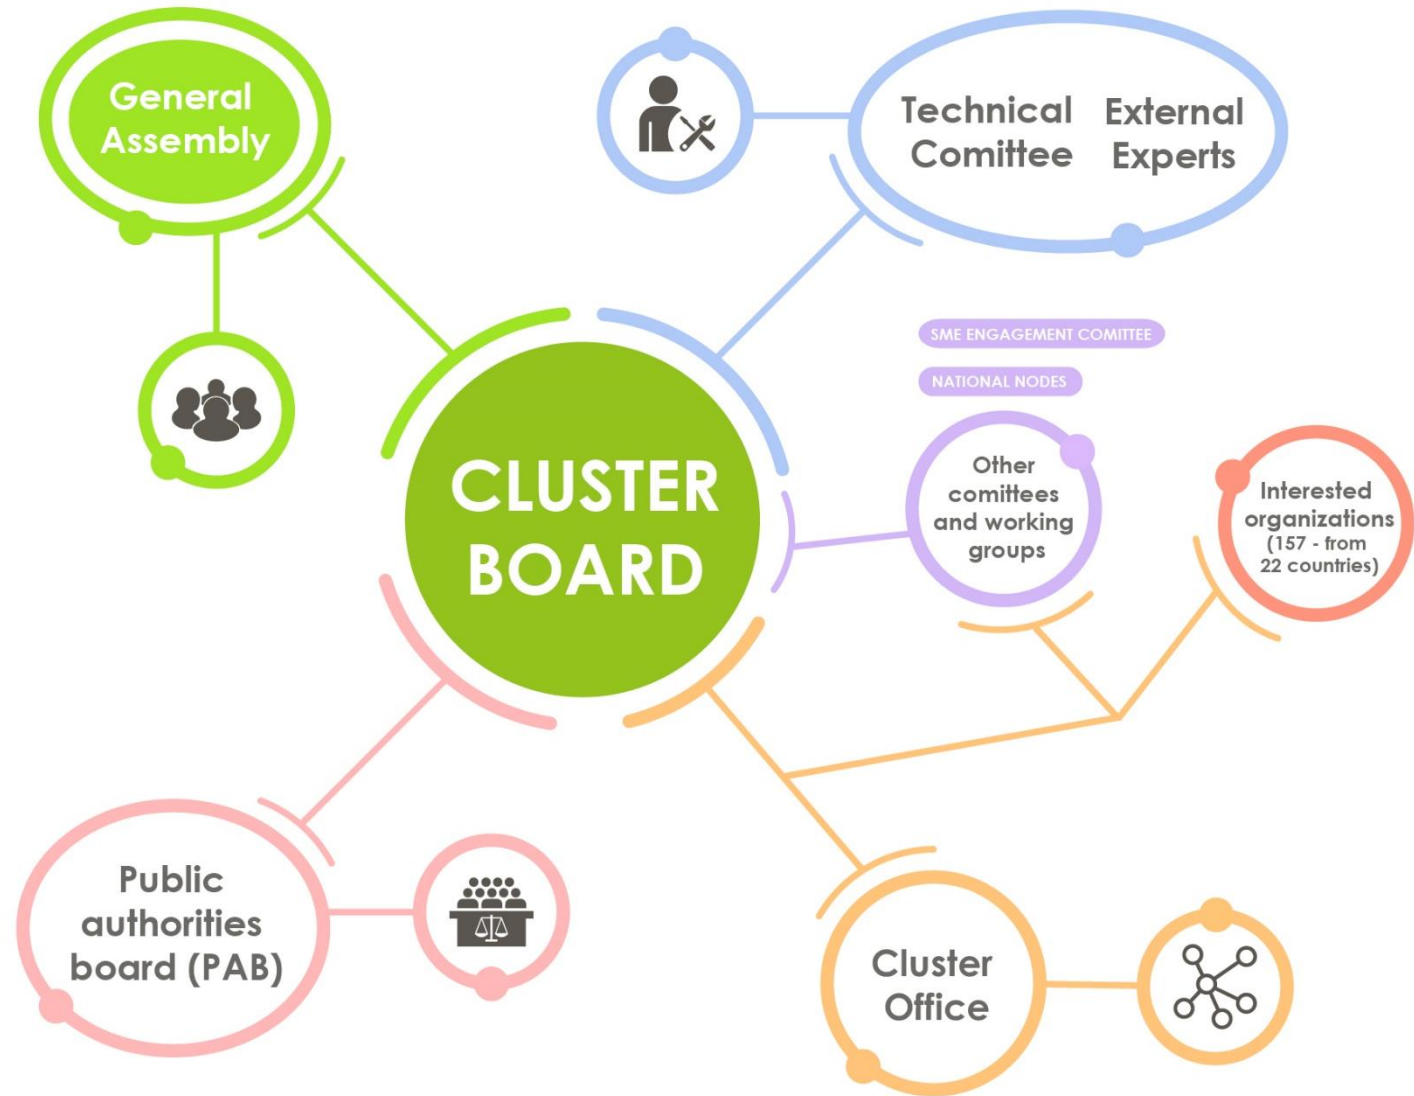

Technical Domains

Customer-based Manufacturing

- Simulation, concurrent engineering methods and prototyping technologies for **shortening development and certification cycles.**
- **Rapid prototyping** techniques.
- **Customization** of products and processes.
- Towards **manufacturing as a service** and additional services for manufacturing operation support.
- Modular systems, reconfigurable machines and processes for **efficient adaptation to customer demands.**

ORGANISING STRUCTURE

SUPPORTING & INTERESTED COUNTRIES

Supporting Countries

 Austria	 Belgium (Flanders Region)	 Chile	 Czech Republic
 Denmark	 Finland*	 Lithuania	 Norway
 Portugal	 Slovakia	 South Korea	 Spain
 Sweden	 United Kingdom	 Turkey	<i>*In process</i>

Interested Countries

 Belgium (Brussels region)	 Canada	 Germany
 Hungary	 Ireland	 Israel
 Russia	 Slovenia	 Switzerland

SMART 

advanced manufacturing

CALL FOR PROJECTS

**Consortium comprised of
at least 2 industrial
companies from 2 different
EUREKA participating
countries**

**Innovative and market
oriented**

Eligibility criteria

Civil purpose

**Budget must be balanced
among partners**

2 Stage procedure

SMART Call will follow a 2-stage procedure, each of them having the following characteristics:

- **Project Outline (PO):** the intention of this short document (approx. 15 pages) is to provide an overview of the project, its main objectives, partnership and impact. Those POs positively evaluated are invited to the second stage.
- **Full Project Proposal (FPP):** describes the project implementation plan in detail, the advance beyond the state of the art and the exploitation and financial plan.

Evaluation

- **Relevance to SMART Program**
- **Quality and efficiency of the implementation – Project planning and consortium quality**
 - Quality of the consortium
 - Added value through co-operation
 - Realistic and clearly defined project management and planning
 - Reasonable cost structure
- **Impact - Market and Commercialization**
 - Market application and impact
 - Market access and risk
 - Competitive advantage
 - Clear and realistic commercialization plan
- **Excellence - Innovation and R&D**
 - Degree of innovation
 - New applied knowledge
 - Level of Technical challenge
 - Technical achievability and risk
- **Contact with NFAs**
 - Contact with National Funding Authorities

Typical SMART Projects

4 - 6 M€

6 - 8 participants

2 - 4 countries

24 - 36 months

*Mean figures from previous SMART calls.
There are no limits on size, duration or budget.*

SMART FIGURES

Budget by countries

Participating Countries: 15

- Supporting Countries: 11
- Interested Countries: 3
- Other Countries: 1

- Number of Labelled Projects: 27
- Total Cost: 54 M€
- **79% success rate**
- Number of Participating Organizations: 147

Budget by legal entity

Third Call

Calendar - Third Call (Opening: 09 SEP 2019)

2 0 1 9

11 NOV

Deadline for PO

2 0 1 9

16 DEC

Announcement of
successful POs

2 0 2 0

23 MAR

Deadline for FPP

2 0 2 0

18 MAY

Selected projects
receive SMART label

SMART Cluster offers

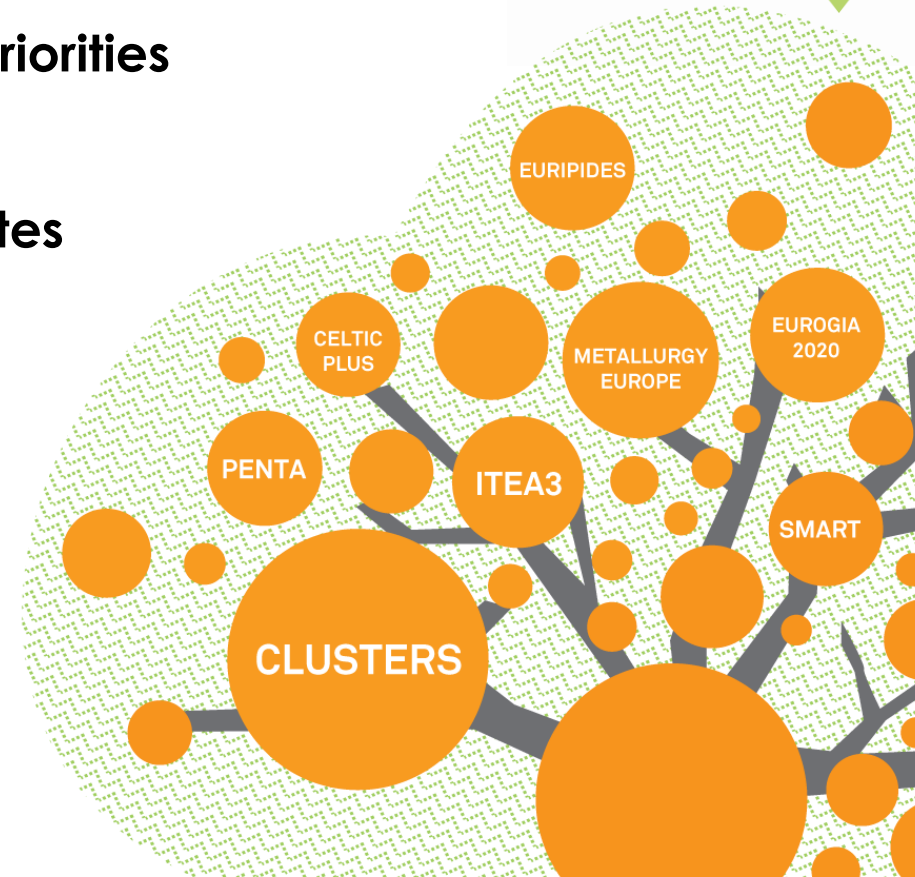

Opportunities for funding **trans-national** R&D&I consortia
In a **fast and efficient** way within a global network

Projects **initiated by industry in line with national/regional priorities**
Agile and flexible project support

A **community** of the **best companies and knowledge institutes**
Aiming at economic impact via research and innovation

Options to integrate along the **whole value chain**
involving **end-users, labs, startups, SMEs and large companies**

Support of **experts with an industrial viewpoint**
To ensure project **relevance** and **quality**
