

Supporting International
R&D projects in

Advanced Manufacturing

9th Call

SMART is a flexible industry-driven EUREKA Cluster on Advanced Manufacturing, whose main objective is the promotion of collaborative and international close-to-market R&D&I projects with decentralised national funding.

Do you have an innovative project idea in advanced manufacturing related to the following topics?

Technical domains

-  Advanced Manufacturing Processes
-  Intelligent & Adaptive Manufacturing Systems
-  Design safe, sustainable and digital products
-  Digital, Virtual & Efficient Companies
-  Person-Machine collaboration
-  Human Centric Manufacturing
-  Sustainable Manufacturing Towards a Circular Economy
-  Customer-Based manufacturing
-  New Business Models

Key application areas

-  Aerospace
-  Automotive
-  Railway
-  Consumer goods
-  Capital Goods
-  Industrial Components
-  Bio
-  Health
-  Agrifood

Build your international consortium with at least two partners from two different countries.

Supporting countries

*In any case, whichever your country, contact your National Agency to explore funding options.

1 Prepare your project outline (PO)

The PO provides a short overview of the concept, the main objectives and the consortium of project (10-12 pages)*.

2 Receive feedback

POs are evaluated and feedback is given when invited to the second stage.

3 Write the full project proposal (FPP)

The FPP is a complete description of the project objectives, excellence, implementation work packages and expected impact.*

4 Succesfull projects get SMART label

After the evaluations performed by a panel of recognised experts in the field of manufacturing, the best projects are granted with the SMART Cluster label.

5 Apply for your national funding

SMART Office can provide you support accessing your National Funding Authority.

Elegibility criteria

SMART projects must have at least 2 partners from 2 different EUREKA countries and the budget must be balanced among participants/countries. No minimum/maximum budgets are defined.

* Remember to upload the info to the Cluster Project's Tool: cluster-projects.eurestools.eu.

PROPOSERS' DAY

14-15/10/2026
